

October 25<sup>th</sup>, 2004 is a date that I will never forget. That was the last day I had to endure 8 hours of I.V.'s and the dizziness, nausea, and fatigue of six months of intense chemotherapy. I could now look forward to watching my hair grow back and regaining the 25 pounds I had lost during my battle with cancer.

My mother was not so fortunate, as her brave fight lasted nearly five years and took her at the far-too-young age of 50.

If I had one wish, it would be that no one else ever has to go through either of these cancer horrors. Magic lamps are hard to come by, but there is something you and I can do RIGHT NOW to continue research for a cure to this deadly disease that has, or will, affect so many of our loved ones.

**From March 25<sup>th</sup> through June 2<sup>nd</sup>** I am participating in a campaign to raise as much money as possible for the Leukemia and Lymphoma Society. This wonderful organization has been helping in the cause to save lives since 1949, and they have been responsible for many advances in the fight against blood cancers, which currently affect nearly 1,000,000 people in the U.S. alone.

LLS has invested more than 680 million dollars towards research, resulting in advances in many forms of cancer treatments. I have worked with them in the past, and my wife even ran two marathons to help raise funds.

I feel we have a real opportunity here to do something good, something positive, and something that can alleviate so much pain and suffering for so many families.

There are two options you can use to make your donation, and please consider asking your friends, family and co-workers if they too would be willing to participate.

Together we will save lives!

Thanks in advance,

Jack Beckman

-Donate online at: [www.ocie.mwoy.llsevent.org/JackBeckman](http://www.ocie.mwoy.llsevent.org/JackBeckman)

-Send check to The Leukemia & Lymphoma Society (LLS)
